

digital active and reactive energy meter with measurement of active and reactive instantaneous power, set up for communication

## ► Direct connection 80 A

### Application

The energy-meters "with a green back-lighted LCD screen for perfect reading" are used to ensure single-phase systems like in Residential, Utility and Industrial applications.

Monitoring of the energy-consumption goes via a SO pulse output. The products can be set up to communicate with LAN, Profibus DP-V0, Modbus RTU, M-Bus, RS-485 and EIB-KNX interfaces are used to analyze the energy-consumption to reduce the running cost to a minimum for Industrial plants and buildings like Offices, Hospitals, Universities etc.

- For information on the operation of the LAN, Profibus DP-V0, Modbus RTU, M-Bus, RS-485 and EIB-KNX interfaces, see page 29-41.

### Function

#### Display

|                        | Unit           | ID                                  |
|------------------------|----------------|-------------------------------------|
| <b>Active energy</b>   | Tariff 1 kWh   | Energy absorbed or supplied         |
|                        | Tariff 2 kWh   | Energy absorbed or supplied         |
| <b>Reactive energy</b> | Tariff 1 kvarh | Inductive or capacitive load        |
|                        | Tariff 2 kvarh | Inductive or capacitative load      |
| <b>Active power</b>    | (k-M) W        | Utilization and instantaneous value |
| <b>Reactive power</b>  | (k-M) var      | Utilization and instantaneous value |

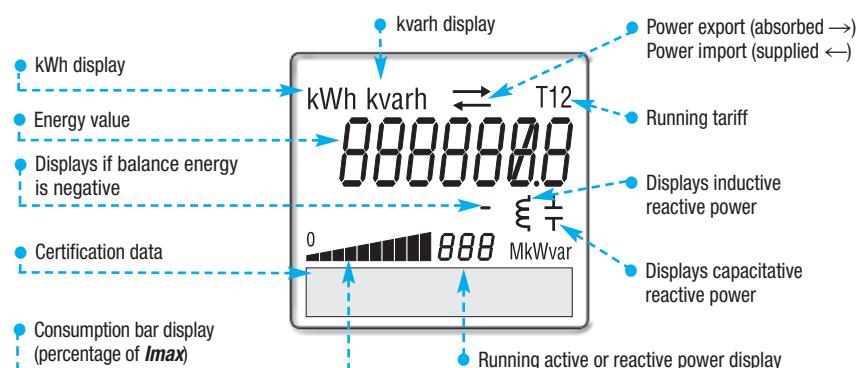

### Communication modules

for the technical data, see page 22-33.

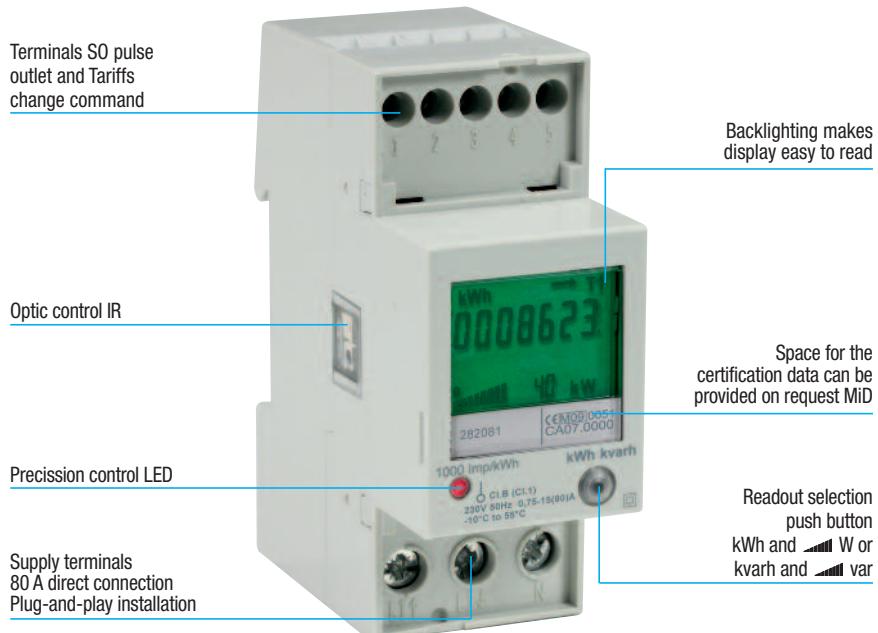

### Display

Liquid crystal display with illuminated green background

### 2 standard module housing, suitable for DIN rail mounting

#### Direct connection 80 A

### Sealable terminal covers

# ENERGY-METERS SINGLE-PHASE

digital active and reactive energy meter with measurement of active and reactive instantaneous power,  
set up for communication - 2 tariffs - 2 SO

## EC1-80

### ► Direct connection 80 A

### Overview

Active energy-meters for single-phase alternating current with either 1, 7 digits digital counters. These meters have 2 SO output generating pulses for remote processing of the energy active and reactive measurements for 2 tariff.

- Green backlit LCD
- For direct connection 80 A
- 7 digits for energy values indication
- Accuracy class 1 for active energy according to EN 50470-3 (**B**)
- Accuracy class 2 for reactive energy according to EN 62053-23
- The standard versions are designed to be combined with the communication module
- Energy register zero setting (**NO MiD**)
- Energy register for import and export
- Instantaneous power active and reactive display
- Sealable terminal covers
- 2 DIN modules wide (36 mm)

### Technical data

Data in compliance with EN 50470-1

#### General characteristics

|                      |                              |       |                                 |
|----------------------|------------------------------|-------|---------------------------------|
| • Housing            | DIN 43880                    | DIN   | 2 modules                       |
| • Mounting           | EN 60715                     | 35 mm | DIN rail                        |
| • Depth              |                              | mm    | 70                              |
| • Reference standard | EN 50470-1-3, EN 62053-23-31 | -     | EN 50470-1-3,<br>EN 62053-23-31 |

#### Operating features

|  |                                |          |           |
|--|--------------------------------|----------|-----------|
| • Connectivity                               | to single-phase network        | n° wires | 2         |
| • Storage of energy values and configuration | digital display (EEPROM)       | -        | yes       |
| • Display tariffs identifier                 | for active and reactive energy | n° 2     | T1 and T2 |

#### Supply

|  |        |             |
|--|--------|-------------|
| • Rated control supply voltage $U_h$   | VAC    | 230         |
| • Operating range voltage              | V      | 184 ... 276 |
| • Rated frequency $f_h$                | Hz     | 50          |
| • Rated power dissipation (max.) $P_h$ | VA (W) | ≤8 (0.6)    |

#### Overload capability

|                     |                   |   |      |
|---------------------|-------------------|---|------|
| • Voltage $U_h$     | continuous        | V | 276  |
|                     | momentary (1 s)   | V | 300  |
| • Current $I_{max}$ | continuous        | A | 80   |
|                     | momentary (10 ms) | A | 2400 |

#### Display (readouts)

|   |                         |                      |                           |

## Technical data

Data in compliance with EN 50470-1

### Safety acc. to EN 50470-1

- Impulse voltage test
- Housing material flame resistance UL 94
- Safety-sealing between upper and lower housing part (mod. 282551)

### direct connection 80 A

|                         |          |
|-------------------------|----------|
| 1.2/50 $\mu$ s-kV class | 6 V0 yes |
| -                       | -        |

### Adaptor for Communication

- Plug-and-play technology
  - LAN Server (TCP/IP)
  - Modbus RTU, Ascii / RS-485
  - Profibus DP-V0
  - M-Bus
  - EIB-KNX
- Ethernet 802.3  
RS-485 - 2 wires  
RS-485 - 2 wires  
2 wires  
EIB-standard

|   |                  |
|---|------------------|
| - | •                |
| - | 10/100 Mbps      |
| - | up to 19.200 bps |
| - | up to 12 Mbps    |
| - | up to 9.600 bps  |
| - | up to 9.600 bps  |

### Connection terminals

- Type cage main current paths
  - Type cage pulse output
  - Terminal capacity main current paths
  - Terminal capacity pulse outlet
- screw head Z +/-  
blade for slotted screw
