MI 3102H CL EurotestXE 2,5 kV

**Insulation
resistance
measurement
with up to 2,5 kV**

MI 3102H CL EurotestXE 2,5 kV is the multifunctional measuring instrument which apart from all the necessary functions for complete installation safety testing according to IEC/EN 61557 performs insulation resistance measurement with the test voltage up to 2.5 kV (measuring range is up to 10 G Ω) and enables diagnostic test by PI and DAR indexes calculation. Besides, the MI 3102H CL EurotestXE 2,5 kV enables online voltage monitoring, phase sequence testing, earth resistance measurement (3-wire and two current clamps method), illuminance measurement and TRMS current measurement. EurotestXE 2,5 kV is equipped with integrated characteristics of fuses and RCDs for PASS / FAIL evaluation of test results. All the results can be quickly saved and referenced on the instrument and then downloaded via the EuroLink PRO software, included in the standard set, to the computer for evaluation and report generation after testing.

Measuring functions:

- Insulation resistance with DC voltage
- PI, DAR calculation
- Continuity of PE conductors with 200 mA test current with polarity change
- Continuity of PE conductors with 7 mA test current (continuous measurement) without RCD tripping
- Line impedance
- Loop impedance
- Loop impedance with Trip Lock RCD function
- TRMS voltage and frequency
- Phase sequence
- RCD testing (general and selective, type AC, A)
- Earth resistance (3-wire and 2 clamps method)
- TRMS leakage and load currents (option)
- Illumination (option)
