

Data Sheet

Transducer for measuring electrical parameters

Application :

Rish Trans measures important electrical parameters in 3 phase Network & replaces the multiple analog panel meters. It measures electrical parameters like AC current, Voltage, frequency, Active The instrument has 4 analog output, Rs232 interface for on site configuration, RS485 interface for on line data collection and optional seven segment LED display.

Product Features:

On site programmable PT/CT ratios:

It is possible to program primary of external potential Transformer (PT), primary of external Current Transformer (CT) on site locally via RS232 interface or local display (optional) or remotely via MODBUS (RS485).

User selectable CT Secondary 5A/1A

The secondary of external Current Transformer (CT) can be programmed on site to either 6A to 1A locally via Rs232 interface or local display (optional) or remotely via MODBUS (RS485).

User selectable PT Secondary

The secondary of external potential Transformer (PT) can be programmed on locally via RS232 interface or local display (optional) or remotely via MODBUS (RS485)

User selectable 3 phase 3W or 4W

User can program on site the network connection as either 3 Phase 3 Wire or 4 Wire locally via RS232 interface or local display (optional) or remotely via MODBUS (RS485).

True RMS measurement

The instrument measures distorted waveform up to 15th Harmonic.

High brightness 3 line 4 digits LED display (OPTIONAL)

Simultaneous display of 3 Parameters

Fast Analog output response(Less then 500ms)

Analog output responds for step input within 500ms.

Number of parameters measured: more than 28

The instrument measures more than 28 electrical parameters of Phase network.

MODBUS (RS485) Output

The ModBus output enables the instrument to transmit all the measured parameters over standard MODBUS (RS485).

Configuration of the Instrument via MODBUS

The instrument settings can be configured locally via Rs232 interface or local display (optional) or remotely via MODBUS (RS485).

Note: The MODBUS communication parameters can only be set locally via RS232 interface or local display (optional).

Analog Outputs (4 Outputs)

4 Analog outputs can be programmed from a list of input parameters.

Compliance to International Safety standards

Compliance to International Safety standard IEC 61010-1-2001

Technical Specifications

Input Voltage:

Nominal input voltage (AC RMS) Phase –Neutral 57.7 –400 V L-L
Line-Line 100 – 693V L-L

Max continuous input voltage 1.2 *Un Continuously

Input Current:

Nominal input current 1 to 6A AC RMS
(programmable on site)
System CT primary values Std. values up to 200kA
(1 or 5 Amp)

Max continuous input current 9Amps

Operating Measuring Ranges

Voltage 5... 120% of rated value
Current 5 ... 150% of rated value
Frequency 46...63 Hz

Measured Parameters

Sr No	Measured Parameters	3 Phase 4 Wire	3 Phase 3 Wire

Overload Withstand:

Voltage 2 x rated value for 1 second,
repeated 10 times at 10 second
Intervals
Current 20x for 1 second, repeated 5
times at 5 min

LED INDICATIONS :

STATUS OF INSTRUMENT	LED RESPONSE	LED COLOUR
STATUS LED		
1) Power ON self check OK	Flashing	Green
2) Power ON self check fail	Steady	Red
POWER ON LED		
Instrument auxiliary supply powered ON.	Steady	Red

Analog Output Response

Response time to step input Less then 500m sec approx.

Display update rate

Response time to step input 1 sec approx.

Accuracy*

Voltage ±0.5% of range (10... 120% of rated value)
 Current ±0.5% of range (10... 150% of rated value)
 Frequency 0.15% of mid frequency
 Active Power ±0.5% of range (50... 150% of a programmed system power)
 Apparent Power ±0.5% of range (50... 150% of a programmed system power)
 Re-Active Power ±0.5% of range (50... 150% of a programmed system power)
 Power Factor 0.5 % of Unity

Reference conditions for Accuracy

Reference temperature 23°C +/- 2°C
 Input waveform Sinusoidal, Form factor 1.1107
 Input frequency 50 or 60 Hz
 Auxiliary supply voltage Rated Value ±1%
 Auxiliary supply frequency Rated Value ±1%
 Power Factor Cos Ø =1 (Active Power Factor)
 Sin Ø =1(Reactive Power Factor)

Influence of Variations

Temperature coefficient : ±0.1% / 10k
 (for rated value range of use
 (0...50°C))

Auxiliary Supply

AC / DC Auxiliary Supply 85V – 230V Or 24V – 60V

VA Burden

Nominal input voltage burden ≤ U²/400 K Ohm
 Nominal input current burden < 0.5 VA approx. per phase
 DC Auxiliary burden Approximately 7 VA (additional 1VA with display).
 AC Auxiliary burden Approximately 15 VA (additional 2 VA with display).

Environmental

Operating temperature -10 to +55°C
 Storage temperature -40 to +85°C
 Relative humidity 0... 90% non condensing
 Warm up time Minimum 3 minute
 Shock ±2g in 3 planes
 Vibration 10... 55 Hz, 0.15mm amplitude
 Enclosure Ip40 housing & IP20 terminals

Applicable Standards

EMC IEC 61326
 Immunity IEC 61000-4-3. 10V/m
 min –Level 3 industrial low level

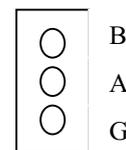

Safety

IEC 61010-1-2001 , Permanently connected use
 IP for water & dust IEC60529
 Pollution degree: 2
 Protection Class II

High Voltage Test

50Hz for 1 minute according to DIN EN61010-1
 5.55kV input circuit /RS 485 / Analog output/Aux supply versus Case.
 3.25kV between input circuits.
 3.7kV Aux supply versus analog output/RS 485/ Case
 490V analog output versus RS 485.

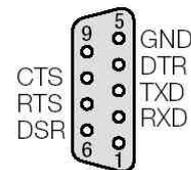

RS485 Interface

Connecting Cable Screened twisted Pair
 Maximum Distance Approx 1200m
 Baudrate 4800/9600/19200bps
 Number of device 32 Including Master)

(Electrically Isolated from all other circuits)

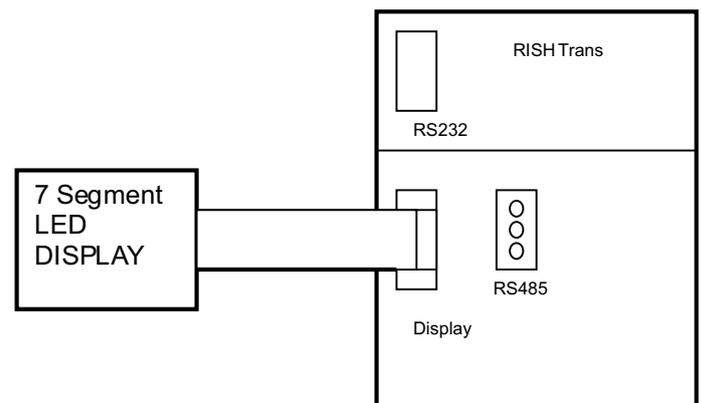

RS232 Interface

DSUB Socket 9 Pin

(Electrically Isolated from all other circuits)

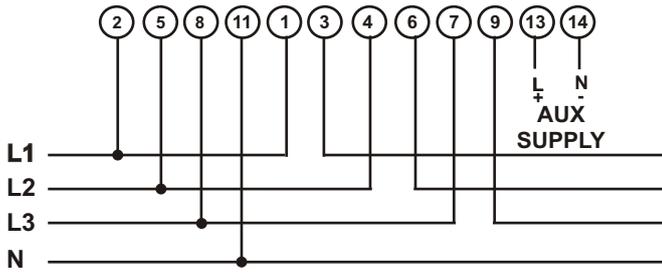

DISPLAY INTERFACE

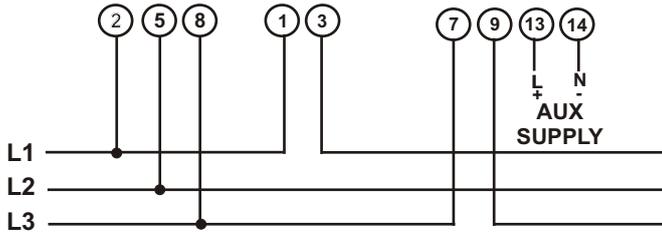

RISH Trans Front

Electrical Connections

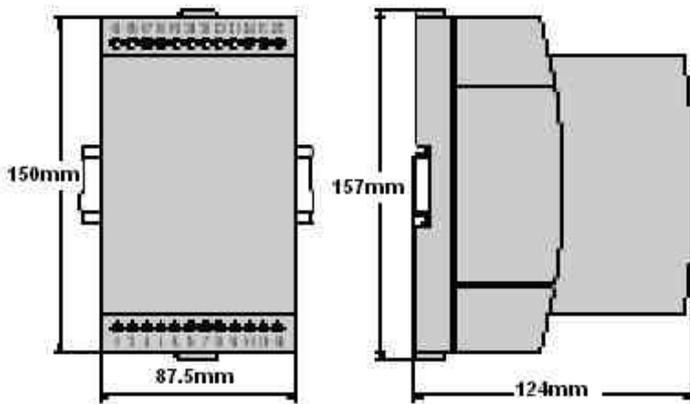

For 3 Phase 4 Wire Unbalanced Load

For 3 Phase 3 Wire Unbalanced Load

Dimensions

Ordering information	Ordering Code
AC Auxiliary Voltage	
85V ... 230V AC DC -10% / +10 %	H
24V ... 60V AC DC -10% / +10 %	L
Optional:	
MODBUS (RS485) output	R
MODBUS Option not used	Z
Optional: Display (Seven Segment LED Display)	
With Display	DP
WithOut Display	Z
Optional: Analog Outputs	
Current Output	I
Voltage Output	V
For Output A	A / Full scale Output/I or V
For Output B	B / Full scale Output/I or V
For Output C	C / Full scale Output/I or V
For Output D	D / Full scale Output/I or V
Ana log Outputs option not used	Z

Analog Output Options

Standard Ranges	Programmable outputs
Current	0...20mA , -20...0...20 mA, 4...20mA
	0... 10mA
	0...5mA
	0...2.5mA
	0...1mA
Voltage	0...10V , -10...0...10V
